Stockholm November 9th, 2018

Dear customers,

October has been a very good month over all. Except from our normal deliveries our customers have also given us the confidence to deliver both standard and special flanges in steel, titanium and special alloys to projects and emergency maintenance in southern Europe and in the USA. We have also completed deliveries to critical applications within oil & gas in the North Sea during this month.

We can offer you a very wide range of products in a variety of different alloys. But not only that, we also offer you many years of our knowledge and expertise about leak free connections and seal perfection. Don't hesitate to contact us! Our technical support and consultation saves both you and your customers time and money. Our sales team are always happy to visit and help you.

We have decided to relocate our ware house in Järna and to integrate the entire stock to the NFAB factory in Själevad. This will strongly streamline our logistic flow from raw material and production to product shipment to our customers. We anticipate shorter delivery times, increased flexibility and cost savings. The relocation of our stock shall be completed by June 2019.

Our ProQ pressure-approved aluminum flange has been ordered by yet another big wholesaler in the Nordic region and we received their first big warehouse order beginning of October.

Winter is coming!

Frederik von Sterneck
CEO Nordic Flanges Group AB (publ.)
